

Social Structure [Construction no. 1]

Performance Technical Diagram

Nick Hwang, Jesse Allison, and Michael Straus, 2011

←→
1 inch: 3 feet

Performance Space ~ 21 ft x 24 ft

Construction Space

3 x 6 ft space

Within the space: 1 elevated 3 x 6 plywood board.

During performance, performers will transfer construction blocks from the Staging Area.

Staging Space

An non-prominent space that construction blocks will be housed pre/during performance.

Required area: 3 x 6 ft.

Projector

The Projector projects images of resonances/dissonance, images from social media (Twitter, Facebook, Flickr, etc).

Video Camera

The video camera tracks the position of the construction block and will coordinate with the Processing Laptop and Projector to change the images. Cable to connect with Laptop required.

Microphone and Stand

Performers and Audience members will speak 'statuses', 'tweets', and social media-related updates.

Processing Laptop

The Processing Laptop will run the performance patch.

Audio Interface and cable

8 channel output interface. (MOTU 828 equivalent).

Stereo Pair

2 Loudspeakers.

Additional Resources

8 XLR cables

1 VGA cable - 15 feet
